

Photo Editing Tip

The new iPhone and iPad update (iOS 10.0.2) includes a text feature for photos. This saves having to import photos into another app to add names and assessments to student e-portfolio samples. Below are a few screenshots to give visuals. The three dots at the bottom right open another set of editing tools. Select the tool box. Then the Textbox [T] option. The text window can be dragged anywhere on the photo with a finger (remember that the portfolio sample grade needs to be placed on the Left hand side so the SIS generated portfolio label does not cover the grade).
